### INSTALLATION INSTRUCTIONS

Please follow the steps below to install your new amFilm screen protector.

01

P  
R  
E  
P

Wash and dry hands to remove oils and dirt.

Clean the screen using provided cleaning cloth

### APPLICATION

02

Align the Screen Protector with all of the edges of your device; make sure the **STEP 1 TAB IS FACING DOWN**. Wrap the two rubber bands around the top & bottom of the device/screen protector to secure it into place.

03

Realign protector as needed and place two of the included Hinge Stickers in between rubber bands to secure the protector to the device. Once the stickers are secure, remove the two rubber bands and set aside.

04

Flip the protector over using the hinge, so the **STEP 1 TAB** now faces up. Repeat screen cleaning from **PREP**. Holding onto the Step 1 Tab, slowly peel back and remove the protective, film layer.

05

Carefully, but quickly flip the protector back over, onto the screen of your device. Make sure it is aligned and secured to the screen. Use the squeegee card to remove bubbles if needed.

*Make sure NOT to remove the screen protector from the device in this step.*

06

Hold onto the **Step 2 Tab** and slowly peel back just the corner of the protective, plastic film at a slight angle. Then remove this entire film layer, along with the tape. Use the squeeze card, placed inside of the cloth to remove any last bubbles.

#### HELPFUL TIP FOR A BUBBLE-FREE INSTALLATION

Apply Screen Protector in the bathroom after running hot water for a few minutes. The steamy environment will reduce the dust in the air, which can cause unwanted bubbles.
