OneTouch

Installation Guide

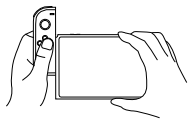

Scan Me

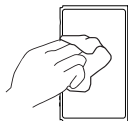

or visit

www.TechMatte.com/install/GLS-NIN

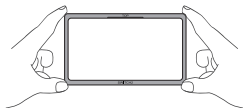

- 1** Detach both Joy Con from your Switch.

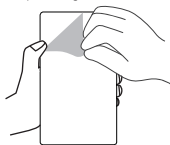

- 2** Begin by cleaning the screen with the Wet Wipe and the Microfiber Cleaning cloth. Remove any dust with the dust removal sticker.

- 3** Remove any case from the Switch. Place the Easy Installation Tray on the Switch.

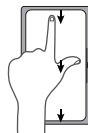

- 4** Peel off the first mask film from the Screen Protector, exposing the adhesive surface.

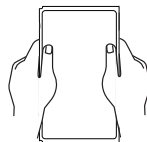

- 5** Using the Easy Installation Tray as a guide, line up the bottom of the protector with one end of the Installation Tray. Slowly place the protector onto the Switch.

- 6** Using your index finger, swipe down the middle of the screen protector so that the protector will adhere itself to your Switch.

- 7** Remove the Installation Tray, and squeeze out any bubbles under the screen protector. Press around the edges to ensure the protector is sealed.

- 8** Re-attach Joy Con and enjoy your Switch.
